LoopCube - the freestanding carrier bag

Today customers demand that products are functional, flexible and durable. At Papier-Mettler we listen to the demands of our customers and after a long period in development we are happy to introduce our new **LoopCube bags**.

LoopCube bags combine the durability and stability of plastic bags with the freestanding and easy to fill qualities of paper bags. The bags are **strong** and **sturdy** and are made from polyethylene. The **flexible, reusable** nature of LoopCube bags enhance their **environmental credentials**, making them the perfect alternative to current carrier bags.

LoopCube bags have the following advantages:

- Waterproof
- Freestanding and easy to fill
- Sturdy
- Reusable
- Attractive
- Available in a wide range of designs

The **reusability** and **freestanding** quality of the bags make them ideal for grocery shopping. In recent years the popularity of reusable carrier bags has increased greatly and LoopCube offers you a **lower priced alternative**.

This unique product also has applications in the non-food industries. The multitude of design opportunities offers you the chance to design a very attractive bag which will make you stand out from the crowd.

LoopCube bags allow you to offer your customers a **functional, flexible, reusable** and **attractive** addition to your current carrier bag range. Improve your brand image and give your customers a wider choice.

Reap the benefits of our experience and ability!
